

## **Club Activities for Academic Year 2025-26 (September 2025-June 2026)**

Club activities are set each term, and children broaden their interests through fun club activities, developing their inquisitiveness and curiosity.

Club activities do not use textbooks. Instead of "learning English", children actively participate in club activities through English, which stimulates their curiosity and enables them to acquire English and global skills in a fun and effective way.

Through club activities, children develop the ability to think independently, express themselves, cooperate and socialise, and develop an intrinsic desire to challenge themselves.

You can find information about the eligibility, lesson schedule, and fee structure in this document.
